

*From the Desk of Organising Secretary*

*Dear colleagues, on behalf of organizing committee we are pleased to invite you to participate in the ONLINE CME on "The Role of Laboratory Medicine in Critical Care". The CME is scheduled on 24th and 25th of April 2021.*

*The aim of the CME is to transcend the traditional boundaries, and to stress the role of various laboratory parameters in the care of the critically ill patients.*

*The CME will comprise an integrated view of both clinical and laboratory aspects.*

*Mallige Hospital is a 40-year-old multi-speciality tertiary care hospital with over 126 beds, conveniently located in the heart of Bengaluru. It was founded by Dr A C Sreeram with a vision of providing standard for excellence in healthcare in India. It was the first centre in Karnataka to perform haemodialysis (1979), intraocular lens implant for cataract (1980), total knee replacement (1983), cadaver harvest of kidney (1989), and cadaver harvest of heart (2000) for transplant.*

*On behalf of organising committee, I extend a warm welcome to one and all, hoping it be a good learning experience.*

*Dr. Pavana A  
Organising Secretary*

## HOW

Register and pay before April 17th 2021, to secure your slot.  
So please register soon!

To do this, simply [click here](#) or go to
